

Context & Problem

Company budgets are set by the day, so the same money goes to a client dinner and a catered lunch, and finance only finds out what each charge was for after it's spent.

Insight

A good budget belongs to one event, fits that event, and closes when the event ends.

Everything you need to budget by the event, not by the day

Filter001

Skip standups, focus blocks, and catered sessions

Price002

Size each budget from attendees, place, and policy

Lock003

Open a Ramp limit at the event, close it after

Match004

Reconcile every charge to its event automatically

Impacts

With Allot, each event gets its own budget, and the money goes away once the event is over. Nobody pays for a lunch the conference already served or puts a client dinner on their personal card. Finance gets to close the month without playing detective.

Allot

Fiona, Kuan, Zi, Sharon

\$140K

Saved every year by a 100-person team that travels monthly

58 days

Of work back each year from forms nobody has to file

1,200

Reimbursement reports that never get written

\$0

Out of an employee's pocket for a client dinner

Model: 1,200 trips a year, each saving \$117 and 23 minutes.
